

👤 About Me

I'm a creative and tech-savvy individual specializing in cybersecurity, digital forensics, and OSINT investigations. I also have strong skills in t-shirt design, 3D logo animation, and video editing, which I offer through platforms like Redbubble and Fiverr. Fluent in Arabic, French, and English—with basic German—I combine technical knowledge with a sharp design sense to build digital products, eBooks, and visual content. Whether it's setting up VPNs, investigating cyber incidents, or creating bold visual designs, I bring both strategy and style to every project.
